Where is your Business Model?

Google → the advertisers are users  
the people are the product

>>> You are the Product <<<

they tell the advertisers  
who does what, where, when.

"The first thing I have  
to tell a startup:  
you have to **FOCUS.**"

you don't know how  
to pass Apple's evaluation.

lots of different devices...

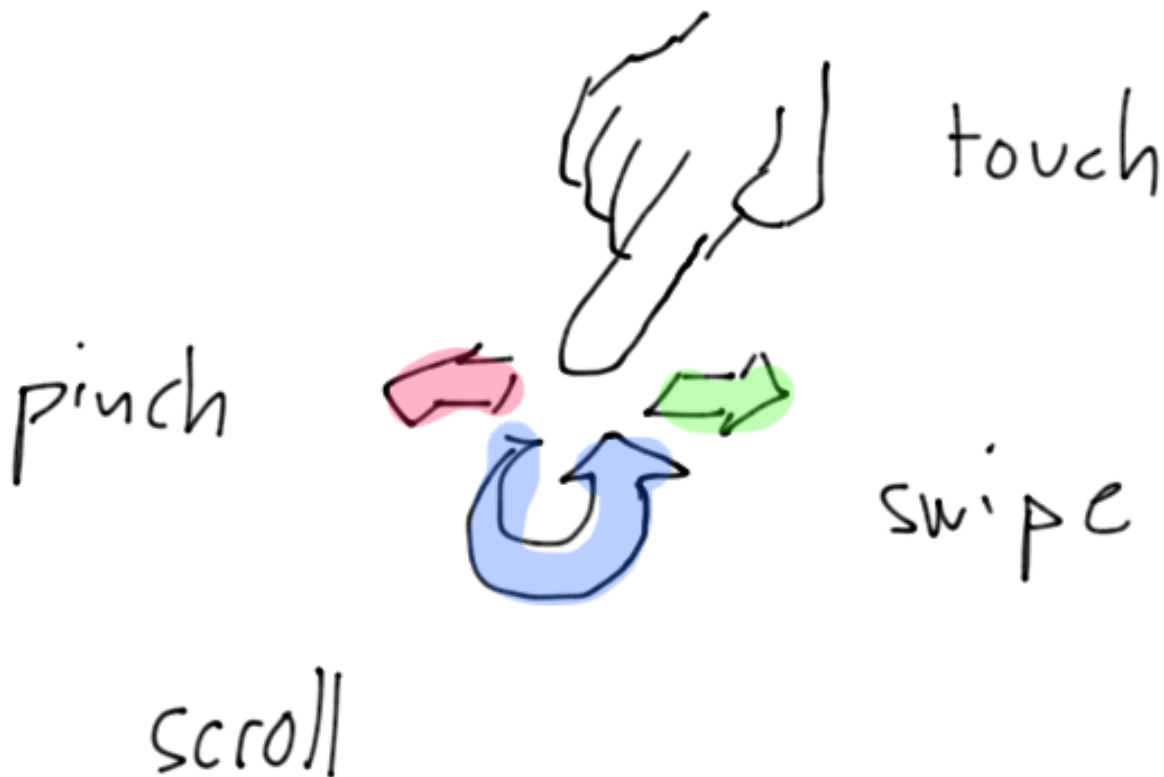

scroll text  
or windows

The differences in scrolling  
bothered Apple...

(...and what about dual boss PCs?)

Everything is changing...  
...are you ready?

## Patents

lots of touch patents made  
in Apple and shared with Microsoft

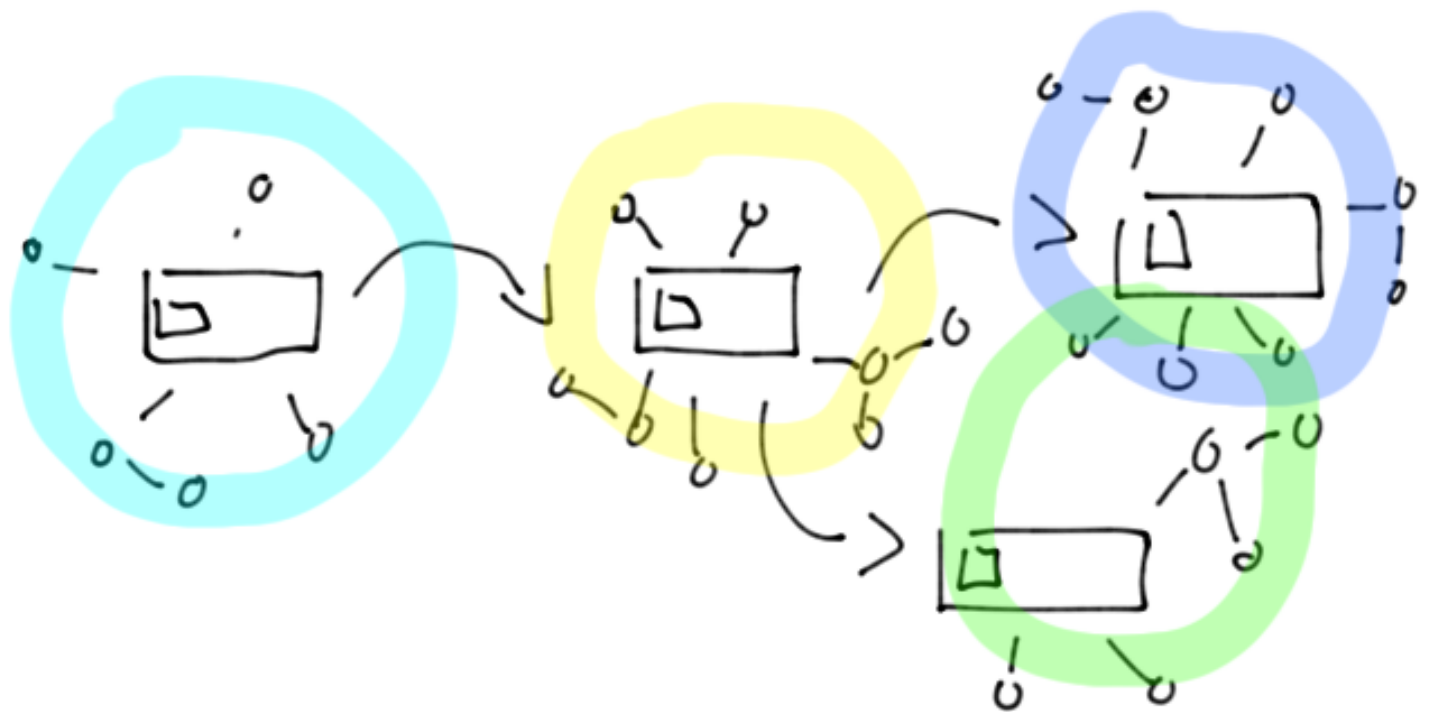

- ① Apple made music legal
- ② Apple made music findable
- ③ Apple made music trivial to buy
- ④ Apple made music trivial to move it to the iPod

Amazon did the same with ebooks

The tweet is good because  
through RT jumps from  
cluster to cluster.

at first it was function

then we want it to be

What is important isn't the experience, but the **memory**.

it doesn't matter  
if you had a bad experience  
if the memory is good

Scroll to the end of  
a long page in Safari  
and Firefox.

in Firefox it just stops

in Safari it bounces

and even in apps where it bounces  
it might not bounce so elegantly.

What makes a movie wonderful are the obstacles.

Look at the attractiveness of angry games.

you fail but you feel you could have succeeded "if only"

3D printing machines  
we are at the beginning

We are developing  
systems

We are building

memories

We lost physical embodiment

but it's coming back

# Kelly Goto

DESIGN ETHNOGRAPHER

Do you love your phone,  
or the experiences in it?

You have to think at the  
space between the  
experiences you create.

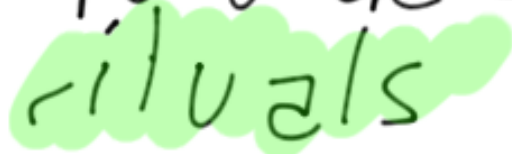

Addiction  Fun

raise your  
head again

we need to evolve back!

We need to understand  
the  rituals

"The surrounding context completely dominated the emotional driving experience."

- Design & Emotion Moves

Focus group gives an indication on what people THINK will do, and it's heavily influenced by others.

We need to break the experience apart to understand what exactly causes what.

↑ it's home!  
gives comfort  
and safety

Function is how a given  
Usable is how a given  
Experiences is  
our current challenge

## EMISSION THEORY

the world is "rendered" by rays coming out the eye

50% of college students believe in it, even after the explanation.

"it's easy to believe in  
ghosts because they  
are invisible,"

we used cameras to see the invisible

"It's 'not about what things  
look like, but what they do,"

TAMAGOTCHI

MOMO

haptic navigator

 the eyes are restored  
to their original function !

HUDs for drivers failed or under perf.

Reality isn't augmented  
by adding layers:

new ways to see,

not more things to see.
